

Prescription for Emotional Support Animal(s)

To Whom It May Concern:

Ryan Boylan is my patient and has been under my care since 2004. I am intimately familiar with his history and with the functional limitations imposed by his emotional/mental health related to suffering from post traumatic stress disorder. This unfortunate condition developed after Ryan was victim of an auto accident that resulted in several herniated disks in his lower back.

Due to this emotional disability, Ryan Boylan has certain limitations coping with what would otherwise be considered normal, but significant day to day situations. To help alleviate these challenges and to enhance his day to day functionality, I have prescribed Ryan to obtain emotional support animal(s). The presence of the animal(s) is necessary for the emotional/mental health of Ryan Boylan because its presence will mitigate the symptoms he is currently experiencing.

Sincerely,

Scott E. Murphy
PhD, PA
